 Clinell Spill Wipes – Instructions for use

Wear recommended PPE. Place the active side (A) face down onto the spill. Leave to absorb for 30 seconds.

Push down on plastic backed side (B) and wipe until spill is fully absorbed. Put the soiled wipe back into the pack.

Remove a disinfectant wipe from a sachet. Clean the spill area in a 'S' shaped motion, from clean to dirty.

Put soiled wipes and empty sachet back into the pack, repeat if required and seal. Dispose of pack as hazardous waste.
