Prontosan is a surfactant antimicrobial solution which is indicated for use on wounds that are at risk of local, spreading and systemic infection.

Prontosan irrigation solution bottles and gel should be labelled with the patient’s identification details, date of opening and discarded within eight weeks of opening.

Prontosan irrigation solution ampules are single use and should be discarded immediately following use.

Prontosan GEL X should be applied up to a 3mm layer of Prontosan GEL X to the wound bed.

Reassess at every dressing change in accordance with the Trust Policy.

Discontinue Prontosan Wound Irrigation Solution/Prontosan Gel X if signs of local spreading and systemic infection have resolved unless the patient has any of the risk factors associated with increased risk of wound infection.

---
