a. Schedule one CDs are not used medicinally and require a Home Office licence. This schedule is not applicable to the RDaSH services

b. Dose must be clearly defined (“as directed” is not acceptable); prescribers address, Date on which it was signed, formulation of the product (i.e., tablet, capsule SR capsule etc), strength (10mg, 10mg/5ml etc), total quantity or dose units in both words and figures (e.g., “30 x 10mg” written as “three hundred mg” or “thirty x ten mg”)

c. Prescriptions are valid for 28 days from the date on the prescription and the quantity should not exceed 30 days

d. This includes relevant monitored dosage systems (e.g., nomads) in which a CD may be in

e. All morphine products other than the **lower** strength solution (10mg/5ml) are schedule 2 CDs. Lower strength morphine solution 10mg/5ml is a schedule 5.

f. Codeine/ dihydrocodeine syrup or tablets up to 100mg per tablet are Schedule 5 CDs. Codeine/ dihydrocodeine injections or higher strength oral forms are schedule 2.
